

Revamping of Reversible Rougher Mill Stand in Canada

Gerdau Canada commissioned AIC the revamping of the 5 Mill Reversible Rougher Stand located at Selkirk plant in Manitoba, Canada.

After having successfully revamped the complete 4 Mill production line at site, AIC is bringing to customer the first steps to fully revamp the other production line as well, and reach with the automation systems at site the state-of-the-art.

(one of the previously supplied drives to site)

About Companies:

AIC Group is a technological partner with extensive experience and deep know-how and stands itself as a global power control supplier and system integrator designing, manufacturing, and implementing automation systems, process control, and mechatronic solutions for both greenfield and revamping projects. Focusing on the steel and metals industries for long and flat products, the Group provides cutting-edge technical solutions by handling complex project schedules and thus establishing satisfactory and remarkable partnerships through its 6 international offices.

More than 45 years of modernization for endless reliability processes.

GERDAU is a leading producer of long steel in the Americas and one of the largest suppliers of special steel in the world. Gerdau's North American business division focus on long steel (Gerdau GLN) and special steel products including beams and piling, merchant bar quality, rebar, special bar quality and wire rod products. The company serves the construction, automotive, agricultural, service center and energy markets through its vertically integrated network of steel mills, recycling, and downstream processing facilities.
