

## Rashmi Group strengthens partnership with AIC India as rolling mill installations progress successfully

Rashmi Group has reaffirmed its trust in AIC India with the successful commissioning of rolling mills as part of its large-scale expansion project. The group placed an order **for eight rolling mills** with AIC India in September 2023, marking a significant step in its commitment to advanced manufacturing capabilities.

Out of the eight rolling mills ordered, four have already been commissioned and have successfully achieved their rated production capacities and speeds. Another mill is currently under commissioning, while the remaining two are expected to go on stream within the next two months. This steady progress highlights AIC India's expertise in delivering high-performance industrial solutions and reinforces Rashmi Group's confidence in their capabilities.

Rashmi Group's association with AIC India began during the COVID-19 era with a small order for a rolling mill initially supplied from China. Encouraged by the quality, performance, and reliability of AIC India's solutions, Rashmi Group significantly expanded its engagement, leading to the present large-scale implementation.

AIC India continues to play a crucial role in supporting industrial growth in India by providing cutting-edge rolling mill solutions tailored to clients' needs. The success of this partnership underscores AIC India's ability to meet industry demands with precision and innovation.

The Complete mill was supplied by fully automatic system that set up the mill through a Recipe system which was integrated with the HMI. The High level of Automation provided a quick learning curve and the customer benefited from ramping up the production within one week of startup.

**About Companies:**

AIC Group is a technological partner with extensive experience and deep know-how and stands itself as a global power control supplier and system integrator designing, manufacturing, and implementing automation systems, process control, and mechatronic solutions for both greenfield and revamping projects. Focusing on the steel and metals industries for long and flat products, the Group provides cutting-edge technical solutions by handling complex project schedules and thus establishing satisfactory and remarkable partnerships through its 7 international offices, Italy, USA, Germany, Brazil, India, China and Czech Republic. 50 years of modernization for endless reliability processes.

AIC decided to enter the Asian market in 2008, selecting India as a reference point and committing to invest in the country. As the CES unit for the Indian subcontinent, **AICIN** works closely with the other units and divisions within the Group.
